

Shutterstock Launches Image Editing and Licensing Capabilities into Google Slides

September 27, 2017 4:03 PM EDT

With the Slides integration, users can easily search, select, edit and download images to create visually stunning presentations

NEW YORK, Sept. 27, 2017 /PRNewswire/ -- [Shutterstock, Inc.](#) (NYSE: SSTK), a leading global technology company offering a creative platform for high-quality assets, tools and services, today announced an integration of image editing and licensing capabilities within Google Slides. This integration allows users to search Shutterstock's library of more than 150 million images and edit any visual content within their presentation using Shutterstock Editor.

Shutterstock's Slides integration offers access to its vast collection of images as well as its leading search functionality powered by custom built machine learning technology. It also provides access to Shutterstock Editor, an easy, feature-filled and efficient design application that saves users time by enabling quick and compelling design edits, such as resizing, adding filters and text, for professional-looking presentations. Users can also upload and edit their own images, product photos and company logos within the Editor application.

"This collaboration helps Google Slides users do more in less time, bringing our collection and editing tools into the popular application," said Jon Oringer, founder and CEO of Shutterstock. "We know our users are already leveraging Google Slides for its unmatched collaboration features, and images are an essential component to building compelling presentations since they emphasize talking points and increase speaker efficacy."

The Google Slides integration comes on the heels of Shutterstock's existing partnerships with Google Ads and Blogger, improving content creators' workflow by offering access to premium, professional imagery within a platform they are already using.
