Non-GAAP Financial Measures

Shutterstock considers adjusted EBITDA, non-GAAP net income, and free cash flow to be important financial indicators of the Company's operational strength and the performance of its business. Shutterstock defines adjusted EBITDA as net income adjusted for interest income/(expense), income taxes, depreciation, amortization and non-cash equity based compensation; non-GAAP net income as net income excluding the after tax impact of non-cash equity-based compensation; and free cash flow as

cash provided by (used in) operating activities adjusted for capital expenditures and interest income/(expense). These figures are non-GAAP financial measures and should be considered in addition to results prepared in accordance with generally accepted accounting principles (GAAP), and should not be considered as a substitute for, or superior to, GAAP results. In addition, adjusted EBITDA, non-GAAP net income, and free cash flow should not be construed as indicators of our operating performance, liquidity or cash flows generated by operating, investing and financing activities, as there may be significant factors or trends that they fail to address. We caution investors that non-GAAP financial information, by its nature, departs from traditional accounting conventions; accordingly, its use can make it difficult to compare our current results with our results from other reporting periods and with the results of other companies.

A reconciliation of the differences between adjusted EBITDA, non-GAAP net income, and free cash flow, and the most comparable financial measure calculated and presented in accordance with GAAP, is presented under the heading "Reconciliation of Non-GAAP Financial Information to GAAP" immediately following the Consolidated Statements of Cash Flows included below.

Unaudited Supplemental Data

The following information is not a financial measure under generally accepted accounting principles (GAAP). In addition, it should not be construed as an alternative to any other measures of performance determined in accordance with GAAP, or as an indicator of our operating performance, liquidity or cash flows generated by operating, investing and financing activities as there may be significant factors or trends that it fails to address. We present this financial information because we believe that it is helpful to some investors as one measure of our operations. We caution investors that non-GAAP financial information, by its nature, departs from traditional accounting conventions; accordingly, its use can make it difficult to compare our results with our results from other reporting periods and with the results of other companies.
